

Quality Audit Services

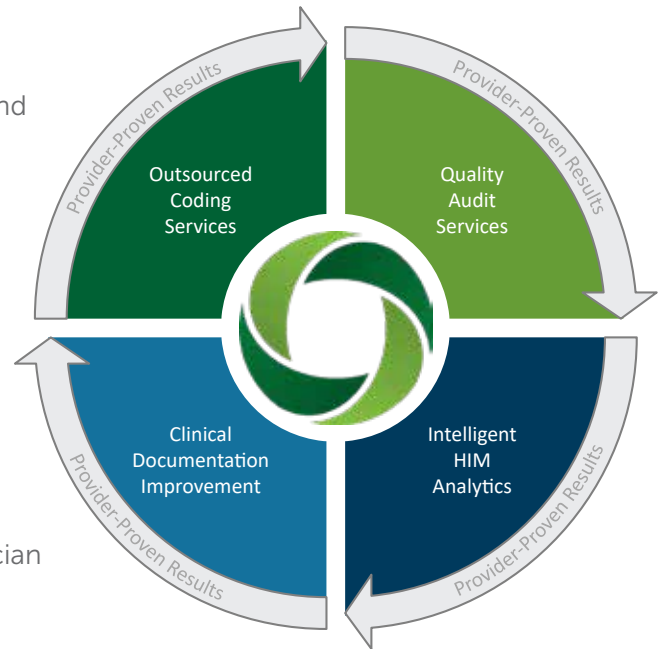

Suspect any coding, documentation or charge capture deficiencies? Want validation of current practices? Looking for measurable and sustainable code-based revenue integrity? We can help.

Using a focused audit approach, we delve deep into your data to identify revenue integrity and risk mitigation opportunities. Whether performed on a pre-billing or retrospective basis, focused, data-driven audits provide greater insights into your organization's coding trends and patterns, generating effective metrics from which overall coding and revenue integrity can be measured. Focused audits are essential to the financial health of your organization!

Our focused audit approach is not intrusive to your daily work flow and emphasizes compliance with national coding, documentation and billing guidelines. Our team of coding auditors provide detailed recommendations with importance placed on education and sustained coding performance improvement.

Audit Deliverables

- Assess the accuracy of the ICD-10-CM/PCS, CPT/HCPCS coding and respective DRG/APC/HCC assignments, identifying differences that may result in payment variances (both overpayments and underpayments.)
 - DRG audits include
 - MS-DRG and/or APR-DRG validation
 - Verification of POA indicators, HAC diagnosis codes, Discharge disposition
 - APC audits assess CPT codes generated by
 - HIM teams
 - Point-of-service/charge capture
 - Risk-Adjusted (HCC) audits include
 - Medicare and HHS HCC methodologies
 - Validation of diagnosis code assignment supported by physician documentation
- Provide insights into physician documentation needs/requirements
- Review nursing documentation as it pertains to specific outpatient service types
- Discuss all proposed changes with your coding and point-of-service charge capture staff prior to finalization of audit results
- Review remittance advices, UBs & HCFA 1500 forms to identify potential claim submission or payment errors
- Conduct Executive Team review of findings
- Provide customized, personalized education as an additional service
- Generate reliable, dynamic and comprehensive reports to trend, track and monitor performance improvement

Our goal is to serve as a trusted advisor, helping you build and maintain the overall integrity of your clinical and financial data.
